

## REMARKS

The cited reference simply determines who is accessing what information. There is no attempt to assign a weight to what is accessed because there is no intent to provide any type of usage metering.

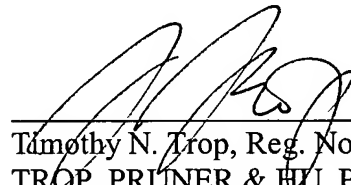

To the contrary, the cited reference is only interested in accumulating how many times entities contact a given website, for example.

It is suggested in the office action that weights correspond to service addresses but in the cited reference all packets are weighted equally. Therefore there is no differential weighting of different packets based on a packet characteristic as clearly set forth in the amended claims.

In view of these remarks, the application should now be in condition for allowance and the examiner's prompt action in accordance therewith is respectfully requested.

Respectfully submitted,

Date: November 23, 2005
